At MCS, our mission is to develop and deliver proven best of breed hire and rental software solutions and associated support services that make your hire business more efficient, competitive and profitable, thus enabling you to achieve a sustained competitive advantage.

Transforming the hire sector

It all started for MCS in 1983. At that time, we developed a hire software solution that would revolutionise how the industry works. One that would automate procedures, control costs, manage assets, co-ordinate contract and customer information, enhance business performance and deliver a competitive advantage.

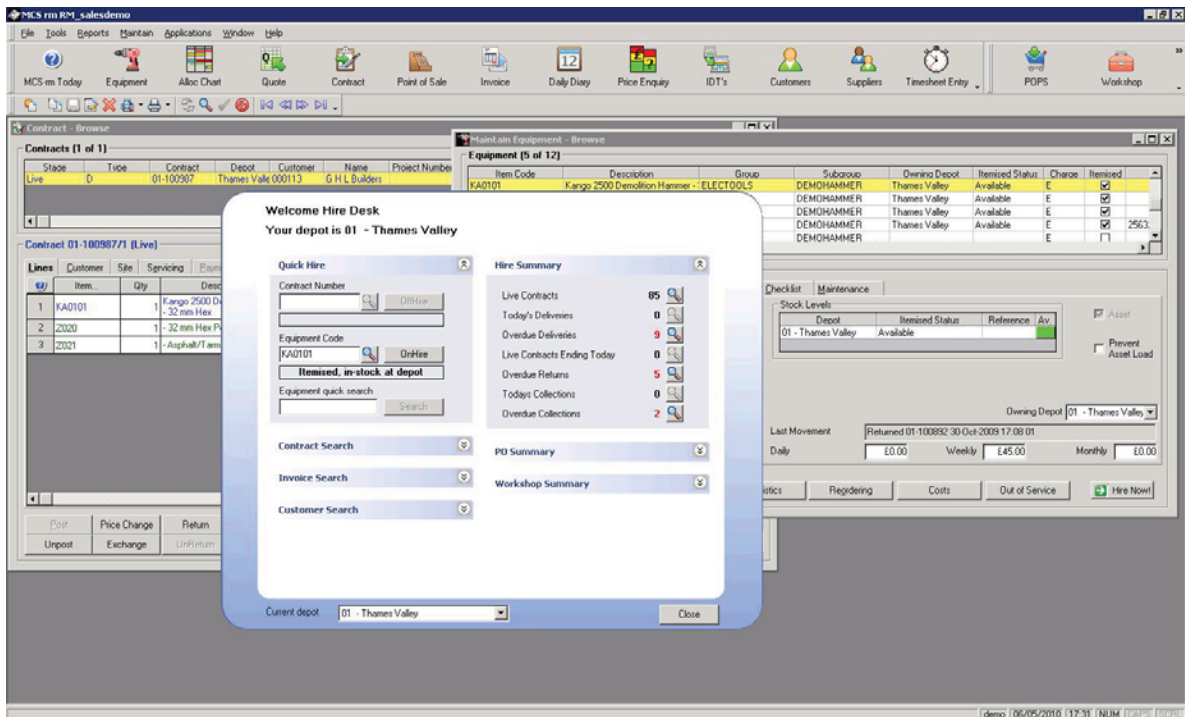

It was a huge success. Since then we have developed it, extended it and enhanced it. And we have grown. Now we offer MCS-*rm*, our world-beating hire software solution, and MCS-*vr*, our exclusive vehicle rental solution.

Working with you

At MCS, we work with you to understand your individual business processes, challenges and key drivers. We have an in-built understanding of your needs from a technical, operational and end-user perspective.

This successful approach is proven by over 370 customers in 14 different countries using our hire management solutions. This equates to over 4000 users in many different hire sectors who rely on MCS software every day to achieve improved customer loyalty, performance gains and operational efficiencies.

Our hire software solutions

MCS-rm and MCS-vr are based on decades of experience, in-depth industry knowledge, technical expertise and reassuring customer service.

Whether you are a single user or a multi-national hire company, our hire

management solutions are readily configurable to meet your specific business requirements.

They are developed on leading-edge Microsoft® Windows and SQL Server technology which offers ease of use and scalability as well as support for a number of different currency and language options.

Our software can provide the maximum flexibility with the broadest choice of functionality and extensive integration options.

Talk to us today to discover how MCS can make your hire business more efficient, competitive and profitable.
